

## Second testing of the proposed change of Service rule in wheelchair singles play – Copa Tango VII – Buenos Aires, Argentina.

The first testing of the proposed change of Service rule for wheelchair singles play was at Romanian Open in Cluj-Napoca, Romania in May 2009.  
As announced earlier there is going to be a second testing of the proposal at Copa Tango VII in Buenos Aires, Argentina on November 19 – 21, 2009.

Just for refreshing, the proposed wording of the new rule:

**Unless rally is a let, a player shall score a point if his opponent makes a service to a receiver in wheelchair in such a way, that the ball, in singles leaves the receiver's court after touching it by either of its sidelines.**

The managers of each country participating at this tournament please inform all your wheelchair players about the testing.

The umpires umpiring in the tournament will be instructed about the testing in detail at the Referee's briefing before the start of the tournament.

The pictures below explain different situations when service is delivered.
