

Para Table Tennis Classification Calendar for 2022

Starting in 2019, ITTF made some changes in the classification strategy to achieve several goals:

- To ensure that classification is performed in the best possible environment so that the classifiers can take their decisions without pressure, rush or any other negative circumstances.
- To help spreading classification awareness among national associations
- To ensure the correct development of classification in all continents

The main changes were:

- All tournaments will have a limit of entries for new players, and they will be admitted on a first come first served basis.
- When that limit is reached, no new players will be allowed to enter.
- Reevaluation of already classified players will only take place in selected competitions and there will be also a limit of players who will be admitted for reevaluation in each tournament.
- No player will be admitted to reevaluation unless he or she fulfill these 2 criteria:
 - o The classification status must be R or FRD2022. Classification status of players is published here <http://stats.ipptc.org/profiles>
 - o The required medical information is sent one month before the competition starts.
- Classification of players with intellectual impairment will only take place in selected competitions and a limit of players per tournament will be set.

In the following pages, you will see several tables containing the information about the tournaments with reevaluation or classification for intellectual impaired athletes and the limits of entries.

Due to the current pandemic situation, ITTF reserves the right to change the classification calendar whenever needed.

Any enquiries about these matters must be sent by the authorized Member Association representative to classification@ittf.com
